Faisalabad, Pakistan

CORE COMPETENCIES

- AI Workflow Automation
- LLM Integration (Claude, GPT, Whisper)
- Conversational AI & Chatbots
- Retrieval-Augmented Generation (RAG)
- Computer Vision (OpenCV)
- Predictive Modeling & NLP
- Python Development
- API Integration & Voice AI (STT/TTS)
- Prompt Engineering
- Technical Training & Mentorship

EDUCATION

BS Computer Science
Riphah International University — 2024

AI Course
NAVTTC Pakistan — 2020

LANGUAGES

- English
- Urdu
- Punjabi

MUEED MUBARAK

AI AUTOMATION ENGINEER | MACHINE LEARNING DEVELOPER
CONVERSATIONAL AI SPECIALIST | AI TRAINER

PROFESSIONAL SUMMARY

Results-driven AI Automation Engineer with 5+ years of experience building intelligent automation systems, conversational AI, and machine learning solutions. Specialized in designing end-to-end AI workflows — from LLM-powered chatbots with voice integration to computer vision pipelines and predictive models. Skilled in modern AI stacks including LLM APIs, RAG architectures, and agentic automation. Complemented by extensive instructional experience, having trained hundreds of students in practical AI and Python development. Committed to delivering measurable business value through automation that reduces manual effort and unlocks data-driven decision-making.

PROFESSIONAL EXPERIENCE

AI Instructor

Ongoing

AZTEC IT Institute — Faisalabad

- Design and deliver project-based AI & Machine Learning curriculum covering 2026 industry trends: agentic AI, RAG pipelines, local LLMs, and multimodal systems
- Lead hands-on labs where students build deployable AI applications rather than theory-only exercises
- Mentor students through capstone projects, from problem definition to working prototype

AI Instructor

1 Year

Career Institute — Jinnah Colony & Kohinoor Campuses

- Delivered applied AI & ML training across two campuses with consistent student progression
- Developed practical exercises translating ML theory into working Python implementations

AI Instructor

1 Year

Arfa Karim Tech Incubator

- Trained students in Artificial Intelligence and Python development within a government tech incubator environment
- Guided learners from programming fundamentals through to functional ML projects

AI Developer

1 Year

Invictus Solutions Pvt. Ltd.

- Engineered machine learning and deep learning solutions for automation and data-driven business insights
- Collaborated on multiple client-facing AI projects from requirements through deployment

AI Instructor

6 Months

Peak Solution — Balash Campus

- Taught AI fundamentals through hands-on practical projects

IT Officer

6 Months

Teps — PMC Islamabad

- Managed MDCAT national entry test systems and maintained campus IT infrastructure under high-stakes exam conditions

KEY PROJECTS

- **Elder Care Monitoring System** *Computer Vision / Real-Time Automation*
Built an OpenCV-based solution detecting falls and safety risks for elderly care, triggering automated alerts.

TECHNICAL SKILLS

Languages & Core

Python, SQL, Git

AI / ML

Scikit-learn, TensorFlow/Keras,
OpenCV, Pandas, NumPy

LLM & GenAI

Claude API, OpenAI API, Whisper,
Prompt Engineering, RAG, Agentic
Workflows

Automation & Integration

REST APIs, Webhooks, Twilio,
Google Calendar API, Supabase

Voice AI

Speech-to-Text, Text-to-Speech
(ElevenLabs)

Development

WordPress, Web Development
Fundamentals

HIGHLIGHTS

- 5+ years of combined AI, automation & instruction experience
- Trained hundreds of students in practical AI & Python
- Delivered end-to-end AI systems from design to deployment

- **Disease Prediction Engine** *Predictive ML / Healthcare AI*
Developed an AI model predicting probable diseases from symptom inputs to support preliminary health screening.
- **Fuel Efficiency Predictor** *Regression Modeling / Data Science*
Created an ML model estimating vehicle fuel efficiency from performance parameters.
- **Business Automation Chatbots** *Conversational AI / Workflow Automation*
Delivered intelligent bots automating customer interaction workflows for businesses.
- **Automated Data Pipeline & Reporting** *Process Automation / Data Engineering*
End-to-end workflow automation for data extraction, processing, and automated insight generation.
- **Document Intelligence System** *OCR / NLP Automation*
Pipeline for automated document data extraction and classification.
